

## ICSI-Corrosion 2021

### Symposium on Corrosion and Degradation of Materials

The International Symposium on Structural Integrity of Corrosion and Degradation of Materials is organised within the “4<sup>th</sup> International Conference of Structural Integrity (ICSI)”, which will take place online on 30 August - 2 September 2021.

This Symposium is intended to be a forum of discussion of the recent advances in the domain of the structural integrity of engineering materials and structures including characterization, maintenance, durability, testing, reinforcement and sustainability. Multidisciplinary contributions from engineers, researchers, consultants are expected.

The goal of this Symposium is to present the last researches on:

- Corrosion characterization
- Inspection, assessment and structural health monitoring
- Non-destructive and laboratory testing
- Numerical modelling and structural analysis of corroded members
- Fatigue and fracture mechanics
- Strengthening and repairing

Organising committee: Nikolaos ALEXOPOULOS (University of Aegean, Greece)
